Patient Name: Baby Srijana Sharma

Sex: Female Age: 3 Years

Father's Name: Sri Suresh Kumar

Address: Naga Road, In Front of SDBM Women's College, Raxaul, East Champaran, Bihar - 845305

Diagnosis: Approx 30% TBSA Thermal Burn with Oro-Respiratory Inhalation Injury

Date of Accident: 31st December, 2016

Date of Admission: 01st January, 2017

Overall Analysis:

The patient - Baby Srijana had been brought in to our Patna Unit (Appolo Burn Hospital) by her relatives and Father - Sri Suresh Kumar at 3 AM on the 01st of January 2017. The child sustained Thermal Burn Injury due to a fire resulting from a leaking LPG cylinder. She was looking over her father who in an effort to fix a leaking LPG cylinder at home, lit a matchstick to check the leakage. A sudden explosion occurred which resulted in her injury. The father, Srijana and her brother Shinu were all injured with mostly 2nd & 3rd Degree Deep burn injury. The burn injury on both feet and wrists of Srijana is deep. She has also injured her face and head partially with superficial Burns. During the course of treatment we plan to follow a conservative approach and Surgical Skin Grafting procedures to close the wound post three weeks of wound care and management. Physiotherapy sessions would also be advised to achieve the best possible results and a contracture free recovery.
