Overall Analysis:

The patient - Master Abhinandan Kumar was brought in to our Patna Unit by his Father - Sri Shankar Saha at 1 PM on 29th October 2017. The child has sustained Thermal Burn Injury due to accidentally coming in contact with hot cooking oil while he was at home. As a result of the incident Master Abhinandan Kumar has sustained mostly 2nd & 3rd Degree Deep 30% TBSA Thermal Burn Injury. The injury is serious and life-threatening since the patient is a child of 6 years. Abhinandan has seriously injured his buttocks, thighs, hips, back and legs. The injury is of a grave nature and is life threatening. We will manage the child conservatively applying wound dressing and debridement procedures to close the wound as early as possible.
